CAMP ISPG

JUNE 20–22, 2023

STRATEGIC OVERVIEW
TUES., JUNE 20 AT 11:00 AM

The ISPG Strategic Overview is an opportunity for all Team Members and Stakeholders within CMS to gather collectively to learn and align around ISPG's Mission, Vision, and Strategic Direction for the upcoming fiscal quarter. This session intends to look ahead to where ISPG is going and celebrate accomplishments, cultivate the continuous learning culture, and bring awareness to ISPG's Stakeholders and areas of needed collaboration.

CYBERGEEK DEMO
THURS., JUNE 22 AT 11:00 AM

Come get a tour of the fully redesigned ISPG CyberGeek website: the user-friendly, authoritative source for security and privacy information. See how the new site brings together the policies, programs, tools, and services that power cybersecurity at CMS -- making it easier for everyone to stay informed and keep systems safe! This is the official launch of the fully redesigned site, with several features that have never been seen live in production before.

SECURITY DATA LAKE OVERVIEW
THURS., JUNE 22 AT 1:00 PM

This session is aimed at bringing awareness and clarity to the Security Data Lake (SDL) effort that's currently underway in ISPG. Attendees will learn answers to questions such as: What is SDL? What is its purpose? What capabilities does it provide? What has been completed already, and what are the plans for the future? It will also shed light on how the SDL fits in realizing the objective of one of ISPG's Big Rocks.

WE LOOK FORWARD TO SEEING ALL ISPG (FEDERAL EMPLOYEES AND CONTRACTORS) AND ALL CMS STAFF.
